OBJECTIVE

Dynamic and results-driven DevOps Engineer with a solid foundation in Computer Science and deep expertise in cloud computing, automation, and infrastructure management. Experienced in designing and implementing scalable, secure, and cost-effective solutions on AWS and Azure platforms. Proficient in managing CI/CD pipelines using Jenkins, GitHub Actions, and GitLab CI/CD, automating deployments, and optimizing system performance to ensure smooth, reliable operations.

EDUCATION

Bachelor's in Computer Science
University Of Gujrat, Pakistan

2019-2023

SKILLS

- **Programming Languages:** Bash, C, C++, HTML, CSS, Java, Python
- **DevOps Tools:** Git, GitHub, GitLab, NGINX, Jenkins, CircleCI, GitHub Actions, GitLab CI/CD, Ansible, Helm, Harbor (Docker Private Registry)
- **Cloud Platforms:** Azure
- **Containerization & Orchestration:** Docker, Kubernetes, Podman
- **Monitoring & Logging:** Prometheus, Grafana, ELK Stack, Metricbeat
- **Operating Systems:** AlmaLinux, Ubuntu, CentOS
- **Soft Skills:** Team Leadership, Project Management, Strong Communication, Problem Solving.

WORK EXPERIENCE

DevOps Engineer

Jun 2024 - Present

Opsoura • Gujrat, Pakistan

- Automated deployment processes using Jenkins, GitHub Actions, GitLab CI/CD, and Kubernetes for seamless application delivery.
- Managed and configured a Harbor Docker private registry for secure container storage.
- Monitored system performance, implemented optimizations, and maintained cloud infrastructure on Azure, ensuring high availability and scalability.
- Configured CircleCI for fast and efficient CI/CD pipelines, improving development cycles and reducing downtime.
- Deployed and managed microservices architecture using Docker and Kubernetes, ensuring fault-tolerant, scalable systems.
- Set up comprehensive monitoring and alerting systems using Prometheus and Grafana for proactive incident management.

Lecturer**Nov 2023-Sept 2024**

MindVerse College, Jhelum • UOS

- Delivered lectures to BS students on various Computer Science subjects, including Computer Networks, Object-Oriented Programming (OOP), Web Development, Cloud Computing, Programming Fundamentals, and Software Engineering.
- Developed course materials, assignments, and exams to enhance the students' learning experience.
- Assisted in curriculum development and provided academic counseling to students.
